

Highlighted Matches Democrats' Reasons

Why the FairTax Benefits Republicans

- Removes the IRS and the 67,500 pages of tax code, and the \$265 billion spent yearly in tax code filing and compliance. 
- Allows you to keep your whole paycheck and determine how you want to pay taxes, not the government.
- Provides a huge boost to the American economy, and key sectors such as manufacturing, and levels the playing field for international trade.
- Creates a new system that, unlike our current tax laws, does not favor debt over wealth.
- Keeps the American military strong by establishing a broader base of tax revenues to fund our forces, than the current income tax.
- No one flies below the tax-paying radar, including illegal immigrants or others who currently are paid below the table, and don't pay income taxes.
- Shores up Social Security and Medicare by creating a larger base of payers including tourists and travelers, not just current tax payers.
- Frees everyone from the hassle of filing taxes every April 15th. Removes not only the income tax, but also FICA, Medicare, capital gains, death taxes and payroll taxes.
- Helps small business owners by removing the burden of payroll taxes.
- Bring jobs back home by making the US the worldwide magnet for capital and investment.
- Retools the American economy to compete in a 21st-century economy.
- Creates transparency in government by removing the tax code as a way for Congress to punish enemies and help friends.
